Solving environment: done

==> WARNING: A newer version of conda exists. <==
  current version: 4.4.10
  latest version: 4.5.3

Please update conda by running

  $ conda update -n base conda
```

```
## Package Plan ##

environment location: C:\Users\woolleyj\Anaconda3

added / updated specs:
- htrc-feature-reader

The following packages will be downloaded:
```

package	build		
pysolr-3.5.0	py36_0	1.2 MB	htrc
htrc-feature-reader-1.94	py36_0	7.1 MB	htrc
ujson-1.35	py36_0	23 KB	
bz2file-0.98	py36_0	13 KB	
Total:		8.3 MB	

```
The following NEW packages will be INSTALLED:
```

Total: 8.3 MB

The following NEW packages will be INSTALLED:

```
bz2file:          0.98-py36_0
htrc-feature-reader: 1.94-py36_0 htrc
pysolr:           3.5.0-py36_0 htrc
ujson:            1.35-py36_0
```

Proceed ([y]/n)? y

At this point, Anaconda Prompt crashed.

When I tried to close the prompt window, I got the message ^CTerminate batch job (Y/N)?

I answered Y but nothing happened. I could not execute the “Close window” option on the tray icon for Anaconda Prompt. I could not close the python.exe process in Task Manager. My only option was to reboot.

Thanks for your help.

James
